PROJECTS

Ecommerce Website

As part of my Bachelor s degree, I designed and developed a fully functional Ecommerce website using HTML, CSS, JavaScript and PHP. The website offers a range of products and services, including a shopping cart and checkout system, seller dashboard and customer account management.

College Management System

As part of my Bachelor s degree, I designed and developed a fully functional college management system using Java Swing and MySQL. This website helps user to manage the daily work of college such as student, faculty, etc.

Book Store Website

Using HTML, CSS, JavaScript, and PHP, I developed a dynamic Book Store Website. The website offers a range of products and services, including a shopping cart and checkout system, seller dashboard and customer account management.
